Mr Colin Heald
LogTag Recorders Limited
PO Box 101-482 NSMC,
Auckland,
Nouvelle-Zélande

Your reference:

20 June 2012

Dear Sir,

Notice of revalidation for user programmable temperature data logger devices

We refer to your following devices: user programmable temperature data logger *LogTag TRIX-8* and 30-day electronic temperature data logger *Logtag TRID30-7*. These devices are currently listed in the PQS database as items E006/006 and E006/013.

We would like to thank you for having submitted the complete dossier for revalidation of these devices under the 2012 annual review.

We are pleased to inform you that these products are revalidated until the 2013 annual review. Accordingly, your device will be published under the "*Revalidated devices*" section on the same WHO web page:

http://apps.who.int/immunization_standards/vaccine_quality/pqs_catalogue/index.aspx

We will notify you formally of the date of next year's review.

Please, allow us to remind you that although PQS does not explicitly call for active monitoring, we do require notification of adverse events and device failures in accordance with our agreement under the terms and conditions of the PQS prequalification scheme.

Please, note that we will inform all UN partners of the prequalification status of your products in a separate letter.

Yours sincerely,

Mr Denis Maire
Technical Officer
PQS Secretariat
FWC/IVB/QSS
