

High Temperature Indicators

SPECIFICATIONS

Trigger Temperature Option Range	Options From: 25°C/77°F to 215.6°C/420.08°F
Accuracy	±1°C or ±2 °C
Activation	Self Activation
Format	Self-adhesive labels
Indicator Display	Unactivated (not triggered): White Circle Visible Activated (triggered): Red Circle Visible
Indication Type	Color-change from white to red
Environmental	Non hazardous, normal disposal (no toxic or glass components)
Storage	Maintain below threshold temperature
Packaging	Roll or sheet form

DIMENSIONS

You can easily monitor high temperatures with the compact, self-adhesive design of High Temperature Indicators.

Custom Size's Available For Bulk Orders

High Temperature Indicators clearly show if a product has been exposed to high temperatures, which can impact quality and efficacy. These indicators help minimize risk and protect your brand. Their efficient, economical design simplifies integration into your supply chain and manages temperature-related issues. Featuring an irreversible color change from white to red, they communicate high temperature excursions effectively. Customizable response temperatures range from 25°C to 50°C, with unique QR code identification.
