

Location

The position of an individual datalogger or external sensor connected to a LogTag Online account.

Team

A team consists of one or more people who have online access to the data collected from a location or group of locations. Teams can consist of a Team Owner, Administrators and Members.

Area

A grouping of individual locations within a team.

Notification

A message that an important event has occurred - generally a temperature excursion.

Events Log

A list of all events such as notifications and inspections

Devices

Any LogTag data logger product or interface cradle that is registered to a team.

Data Delivery

The method in which data is delivered from data loggers to the LogTag Online cloud.

Data Storage

The form in which data is stored within LogTag Online. Can be either location data or data files.

Locations

The place within LogTag Online where individual locations are created and manipulated.

Drive

The storage place for LogTag data files that are not related to a registered location.
